EDITORIAL

Hello world,

With World Literacy Day on 8th September, the theme of this newsletter highlights how technology can alleviate literacy rates around the world.

In this new age of the machines, one needs to learn to navigate increasingly digitally-mediated societies, and to explore effective education enhancing programmes that can leverage the opportunities that the digital world provides. Hope you enjoy reading our thoughts on how digitisation of school management systems can lead to improving quality education and instilling in the right skills in today's children.

Regards,

Team Communication

LITERACY DAY

BACKGROUND

The 8th of September was proclaimed International Literacy Day by UNESCO at the 14th session of UNESCO's General Conference on 26 October 1966 to remind the international community of the importance of literacy for individuals, communities and societies, and the need for intensified efforts towards more literate societies.

The idea of an International Literacy Day was born at the World Conference of Ministers of Education on the Eradication of Illiteracy, held in Teheran, Iran, on 8-19 September 1965.

Since the first International Literacy Day in 1967, celebrations have taken place annually around the world, coordinated by UNESCO, countries and partners, to advance the literacy agenda at global, regional and national levels

EMBRACING DIGITAL TECHNOLOGIES

Digital technologies are changing the way people live, eat, work, learn and socialise. For instance, mobile subscriptions, which had been a few tens of thousands in 1980, were about 7 billion in 2015. In Africa, mobile subscriptions increased from almost zero in 2000 to around 900 million today.

This transformation has resulted in a better access to information and knowledge that previously, used to be out of reach or costly. A host of services especially educational ones, can now be delivered at a more accessible and efficient way. Its time to embrace this change and allow ICT enabled transformation into school operations.

HOW CAN EDUCATIONAL TECHNOLOGY SUCH AS UNITY ERP CHANGE LIVES?

A school management software is just an example of how integrating technology in the field of education can have an enormous impact benefitting the lives of not only the students, through an enhanced learning experience but also the lives of all stakeholders involved.

Adopt digital technologies such as unity erp for strengthening school management systems

Administrators get enabled with the right tools to operate their schools efficiently

Teachers get access to a portal for easy access and management of teaching resources and communicating means

Parents get instant updates of their child's performances and can monitor their safety without worries.

Students get access to learning materials, relevant information making easing the way to their academic and holistic development

EVOLVING WITH TIMES

In an age of internet wherein most people carry smart devices in their pockets, it would be a folly to not utilise this platform for the advancement of education.

We, at Edurama Solutions, aim to digitise schools globally, making it easier, almost automatic to manage schools, so that our sole focus remains on learning and the sharing of knowledge.

To realise these goals, we remain committed to be ever evolving, always studying the latest technologies; and integrating them with our products.

“Equipping teachers with technology that will automate the boring work will enhance education and make it more powerful. Teachers can spend more quality time on what they are good at i.e teaching,” Unni Korothe

GET IN TOUCH WITH US

Checklist for consideration:

- Are you having trouble managing your school or institute?
- Do you get lost in the immense paperwork with manual data entry and processing?
- Are you unable to track your students presence from their entry and exit points from school buses and premises accurately?
- Are you unable to get real time updates on your students movements?
- Are you unable to establish an effective two way communication system between all stakeholders?
- Do you have difficulty in managing finances effectively?

IF YOU ANSWERED YES FOR ANY OF THE ABOVE, THEN YOU NEED
